

Smart Box

for Control/Data Interface and Power

Smart box can control the system by connecting various interfaces according to the user's needs. Independent power control is possible and you can work through the Internet by connecting wi-fi. With its compact size, you can install various software anywhere and use it to suit your needs.

Features

- Programmable IoT Command/Data and Power Controller
- Web-based GUI
- Provides a communication interface function that can be controlled from Internet
- Independent power control
- Control function using RS-232 port

Specifications

Input Power	Input: AC 250V - 15
Output Power	Output: 5 Outlets (AC 250V - 10A)
Processor	Quad-core ARM 1.5 GHz
RAM	LPDDR4 2GB (up to 4GB)
Data Interface	RS-232 x 4 ports USB 3.0 x 1 ports (up to 3.0 x 2 ports, 2.0 x 1 port) Ethernet 1 Gbps Wi-Fi 802.11b/g/n/ac Dual-Band

* Powered by Raspberry Pi
